June 30, 2009

Vista Media was proud to be chosen by the New Mexico Aging and Long-Term Services Department to produce the documentaries "The Silent Epidemic – Mild Traumatic Brain Injury" Parts 1&2 and their companion documentaries "In Harm's Way – Traumatic Brain Injury in Young Children" and "The Critical Link – CHRs & Traumatic Brain Injury in Indian Country." These ground breaking documentaries focus on the very real epidemic of traumatic brain injury in society and gives targeted viewers tools for identification and management of traumatic brain injury.

These documentaries were the direct result of a grant from the Health Resources and Services Administration (HRSA) and the State of New Mexico Aging and Long-Term Services Department (NMALTSB). The objective was to create a series of high quality informational DVDs to increase traumatic brain injury awareness and make them widely available to their target audiences and the general public. To that end, duplication of the DVDs is encouraged as long as the four core titles are used in their entirety.

**These award winning documentaries can be customized for your group, association, or program. Vista Media has been authorized by the New Mexico Aging and Long-Term Services Department to produce these custom DVDs for your organization.** The original DVDs commissioned by NMALTSB contain additional information in the form of video presentations and important documents that are specific to the state of New Mexico. **Vista Media can incorporate your existing materials and/or help your group produce custom presentations specific to your use.**

For more information on how these DVDs can be customized, contact me at 505-889-0001 or via email [wayne@vistamedia.net](mailto:wayne@vistamedia.net).

We look forward to helping you find new ways to use these productions to increase traumatic brain injury awareness in your community.

Best Regards,

Wayne A. Johnson  
President
